

post·di·lu·vi·an (pōst ˈdi lōō ˈvē ən)

adj.

1. Existing or occurring after the Flood.
2. Modern; not antiquated.

8 April 2007

Hello! The biggest news since my last newsletter is that my solo show, "In Plain Sight," took place at the [Frank Bette Center for the Arts](#) from February 2-25. It was a lot of work hanging 18 pieces (with another 18 matted photos in the bins), but I was really pleased with the result and very appreciative of the turnout and feedback the show received.

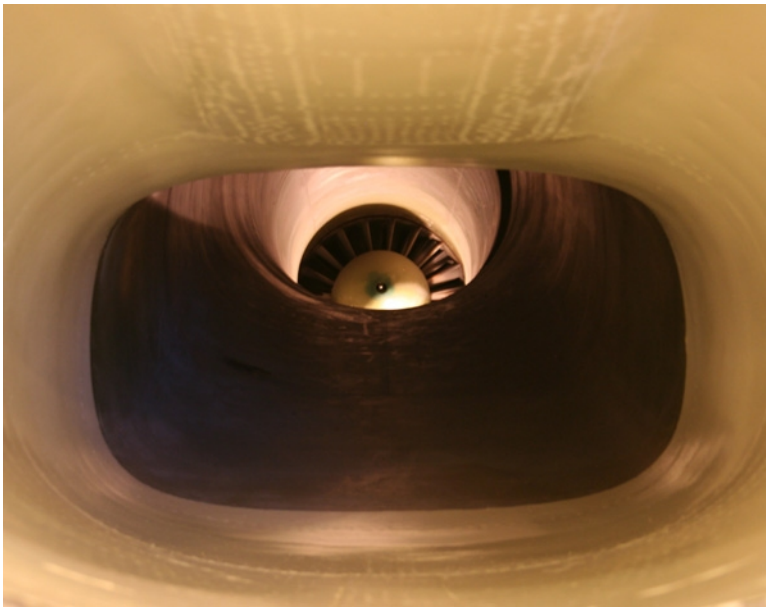

Two walls from "In Plain Sight" at the Frank Bette Center for the Arts

As I mentioned in the last newsletter, I had applied to "Alameda on Camera - A Photo Documentary," a juried event at the Frank Bette Center. I was one of forty photographers chosen to take part, taking photos of a randomly assigned geographic region in Alameda the weekend of February 24-25. I was assigned the USS Hornet and surrounding area on the former Naval Air Station. It was cold and wet, but still a lot of fun. A few of the photos I took that weekend are shown here. **The show is currently at the Frank Bette Center** and will run through April 29.

After "Alameda on Camera," my next scheduled show is "Alien Landscapes," a solo exhibit at [Julie's Coffee & Tea Garden](#) at 1223 Park Street in Alameda. The opening reception will be Friday, June 1, from 7-9 PM, and the show will run through June 30th. I hope to see you there!

I added many new photos to the [Portfolio page](#) of my website and my [Shutterfly gallery](#) in early February. If you haven't visited them since then, please check them out.

Please forward this newsletter to anyone you think may be interested, and they can [subscribe](#) themselves. If you'd like to catch up on previous newsletters, there's an archive on the Contact page of [my website](#). Thank you again for your support.

Warm Regards,

Michael Singman-Aste
